MIROC6 | SSP585 | essential K-comparison checks
Fit quality and local optima
AIC above minimum over K=4–9
Number of classes (K)
Seed 42
Seed 43
Seed 44
Best of seed batches
Ambiguity and small regions
Fraction of analyzed ocean area (%)
Max posterior < 0.8
Smallest class
Number of classes (K)
Initialization sensitivity at each K
Adjusted Rand index vs selected fit
Seed 42
Seed 43
Seed 44
Number of classes (K)
Spatial persistence from previous K
Area retaining its matched color (%)
Number of classes (K)
