MIROC6 | SSP585
Annual SST, 2015–2100 | EOF1+2: 85.2% | 2100 reference CO_2: 1135 ppm

Colors follow maximum area overlap with the preceding K; splits and boundary rearrangements are allowed.
K=4 IDs start in warming order; later IDs track overlap, not warming rank. Grey background: land / missing data.
CO_2: scenario references (Meinshausen et al., 2020; Jiang et al., 2023), not model-file concentrations.
